

Safely with personnel elevating platform

Selection

Work site name: _____

Date: _____

Document filler's name: _____

Issues affecting the selection:

Is the lift used indoors, outdoors or both?	
To which duty/duties is the lift required to?	
The type of power available/allowed (grid electricity, battery, combustion engine)?	
What is the highest needed working platform height?	
What is the minimum width/height of the transfer route at the work site?	
What is the maximum horizontal reach needed (the distance between the support point and the working point)?	
What is the maximum load needed?	
Is there a need to move the lift from the working platform?	
What is the carrying capacity and the profile of the surface, are there any slopes or ramps?
